Communications for Business

One point of contact for all your communication needs

Urbancoms Ltd is a provider of communication solutions serving the SME, Enterprise and Corporate marketplace; our portfolio encompasses voice, data, mobile & complete systems solutions. The Director of Urbancoms, Joanna Koushi, has been in the telecommunications industry for over 10 years and has a passion for service excellence with a holistic view, which has been the key to the organic growth of the company. ►

Why choose Urbancoms?

We provide cutting edge solutions, and have a broad understanding of communications across various platforms and services as well as being industry experts in their integration – which means we understand how they all work together...something we always consider when engaging with our partners about new solutions. Any solution provided by Urbancoms will be future proof and take into account the short, medium and long term objectives of your business.

Business Calls & Lines

Urbancoms offers a range of lines to suit the needs of all businesses, large or small: delivering a single bill for all your services, full UK-based support and the ability to simply add services as you need them to give you complete flexibility. In addition, we believe that each customer should have the flexibility of 90 day rolling plans.

- Single analogue lines
- Multiple auxiliary analogue lines
- ISDN2
- ISDN30
- Sip Trunks

Business Telephone Systems

Your telephone system is crucial to your business, providing an essential link between you, and your customers, suppliers and partners. Whether you're a small, medium or a large corporate, we have a solution for you!

- Provider of worldwide leading manufacturers
- Analogue, Digital or SIP Enabled Business Systems
- Fully managed hosted solutions
- Full support for your communications platform

Infrastructure

Urbancoms provide end-to-end LAN infrastructure solutions, as a new provide or to add to an existing network. This includes:

- Carrying out LAN survey and provide a proposal
- Provide Cat 5 /6 cabling
- Voice Cabling
- Switches & Comms room equipment.

Internet Access

Businesses that need big bandwidth are turning to Ethernet for fast, future-proof connectivity. We provide the following connection types:

- ADSL (Max, ADSL2+, Annex M)
- EFM (Ethernet First Mile)
- Fibre Ethernet (10Mb, 100Mb & 1Gb bearers available)
- Internet facing or MPLs facing
- Wires only or fully managed

08 Numbers

Urbancoms offers a wide range of inbound numbers to allow you to compete in the inbound marketplace. These include:

- Freephone numbers
- 03 numbers
- Local presence – for businesses that wish to portray a local presence, or are based in an area where callers prefer to use local dialling codes.
- 08 numbers

Business Mobiles

Voice is now an essential, but email, internet and application access on the move are rapidly becoming “must have” technologies too.

- Network agnostic to the major providers
- 12 / 24 month contracts or SIM only
- Bespoke business packages
- Voice / Data mobility

“The level of service we receive from Urbancoms is incomparable to that of BT yet it costs us less than what we were paying with BT.”
Maunder Taylor

At Urbancoms, customers come first. And the story doesn't end with designing the ideal solution or reducing your outgoing revenue.

We are on call to ensure your telecoms run smoothly. Just one call is all that's necessary - we do the rest.
